Weapon Special Moves
By Sword

For quick reference, this
breaks down weapon
special attacks by sword.
(P) means Primary Ability,
(S) means Secondary, a *
symbol before the
attack name means it
requires Tactics as a
secondary skill as normal,
an @ before the move
name means it requires
Bushido or Ninjitsu
according to the tooltip.
A # means the skill
requires Stealth.

Swords by Speed and
 SSI/Stamina Required to
 Hit MinDelay Between
 Swings

Swords fall into one of
 8 different speeds. To
 determine the minimum
 delay between swings, a
 combination of current
 Stamina (not maximum!)
 and the combined total
 Swing Speed Increase
 enchantments on the suit
 and sword are used to
 calculate the delay in
 between swings. For
 reference without a
 calculator, this chapter
 breaks down the basic
 swords by their weapon
 speed in seconds, followed
 by the stamina required
 to hit the shortest
 possible minimum delay of

1.25 seconds between swings at various levels of swing speed increase. Swing Speed Increase caps at 60 and Stamina caps at 250, so some weapons can never hit the 1.25 second swing delay at certain levels of SSI or Stamina, in which case the entry will have an X. Base speeds that have no swords in that category will be omitted.
